Kalaburagi, Karnataka

PROFESSIONAL SUMMARY

Information Science and Engineering student with an 8.80 CGPA and hands-on knowledge of Python,SQL, DBMS, data analysis,cloud computing, and software testing. Experienced in academic projects involving cloud resource management, intelligent auto-scaling, data visualization, document processing, OCR, and text summarization. Familiar with Git, GitHub, Pandas, NumPy, Tableau, Dash, Plotly, and Jupyter Notebook. Strong communication, analytical thinking, problem-solving, teamwork, adaptability, and quick-learning skills, seeking an internship or entry-level software engineering opportunity.

EDUCATION

St. Ambrose Convent School, Wadi (Jn), Kalaburagi **2021**
SSLC: 83%

Sanganabasava Residential PU College, Karnataka **2021–2023**
Pre-University Course (PUC): 89%

B.E. – Information Science and Engineering **2023–2027**
Don Bosco Institute of Technology, Bengaluru **CGPA: 8.80**

ACADEMIC PERFORMANCE

1st Sem: 7.95 SGPA **2nd Sem:** 8.87 SGPA **3rd Sem:** 9.29 SGPA
4th Sem: 8.90 SGPA **5th Sem:** 8.86 SGPA **6th Sem:** 8.76 SGPA

TECHNICAL SKILLS

Programming: Python, Basics of C,Basics of Java
Web Technologies: HTML5, CSS3,
Data Analysis: Python for Data Analysis, Pandas, NumPy, Tableau
Database: SQL, Database Management Systems (DBMS)
Cloud Computing: Cloud Computing, Virtual Machines, Auto-Scaling, Resource Allocation, Resource Monitoring, Profit Optimization
Software Development and Testing: Full Stack Development, Software Testing, Debugging, Troubleshooting
Document Processing: OCR, PDF Text Extraction, Document Analysis, Text Processing, Text Summarization
Tools: Git, GitHub, Jupyter Notebook, VS Code, Dash, Plotly

PROJECTS

Intelligent Auto-Scaling and Profit Optimization in Cloud Computing

- Developed a cloud resource management system to dynamically allocate and deallocate virtual machines based on workload requirements and resource utilization.
- Monitored CPU utilization, memory utilization, VM usage, and workload requests to implement an intelligent auto-scaling policy.
- Calculated resource cost, user cost, provider revenue, and profit to evaluate the financial efficiency of dynamic cloud resource allocation.
- Built an interactive dashboard using Python, Dash, and Plotly to visualize resource utilization, response time, cost, revenue, and profit.

AI-Based Illegal Document Detection and Summarization

- Developed a Python-based document processing application to extract and analyze text from uploaded PDF documents.
- Applied document processing and text analysis techniques for document detection, classification, and automated summarization.
- Integrated PDF text extraction and OCR concepts to process documents with different formats.

CERTIFICATIONS

Python for Data Science – Infosys Springboard
Full Stack Development
Frontend Web Developer
Database Management System – Udemy
Data Analysis
Cloud Computing
HTML5, CSS3, JavaScript
Deloitte Cyber Security

ADDITIONAL INFORMATION

Core Strengths: Communication, Problem Solving, Analytical Thinking, Teamwork, Adaptability, Quick Learning
